LK Series

The LK Series metering pump is the largest in the high performance line of pumps from Walchem. The LK is a motor-driven, mechanically actuated diaphragm metering pump with a maximum capacity of 114 GPH (432 l/h) and a maximum pressure of 225 PSI (1.5 MPa).

The heart of the LK is a compact and very reliable dual-cam system drive and worm gear reducer. Roller bearings and oil bath lubrication ensure outstanding durability and wear resistance in continuous operation.

The LK Series is ideal for chemical feed applications in a wide range of fields, including water treatment, chemical process, agriculture, mining and paper.

Summary of Key Benefits

Liquid Ends
Drive from the gear reduction unit is directly transferred to the diaphragm. This design is economical, yet retains a high degree of versatility. Liquid ends are available in PVC, PVDF and 316 SS for handling acids, bases, solvents, polymers and slurries.

Stroke Adjustment
Accurate and reliable stroke setting is accomplished with a micrometer dial of the springback stroke adjustment mechanism. This lockable mechanism is adjustable from 10 to 100%.

Drive
The LK utilizes a dual-cam system drive with a built-in worm gear type speed reducer. The aluminum bronze worm gear and the tapered roller bearing provide efficient transmission of motor power to the pump. This compact and rigid mechanism provides maximum wear resistance in continuous operation over long periods of time.

Motors
All of the standard models employ totally enclosed fan-cooled motors which are vertically mounted to save space. A variety of motor options are available, including explosion-proof and DC variable speed motors for external control by a 4-20 mA input signal.

LKN = LKN Series motor-driven metering pump with NEMA 42C motor mounting flange

**CAPACITY/PRESSURE RATING**
See chart on this page

**MOTOR CODE** (All 42C Face)

- **A** = 115/230V, 60 Hz, 1 Ph, 1/3 HP, 1725 RPM, TEFC
- **B** = 230/460V, 60 Hz, 3 Ph, 1/3 HP, 1725 RPM, TEFC
- **C** = 190/380/230/460V, 50/60 Hz, 3 Ph, 1/3 HP, 1450/1725 TEFC
- **D** = 90VDC, 1 Ph, 1/3 HP, 1750 RPM, TENV Variable Speed Motor, 115V Control
- **E** = 180VDC, 1 Ph, 1/3 HP, 1750 RPM, TENV Variable Speed Motor, 230V Control
- **F** = 230/460V, 60 Hz, 3 Ph, 1/3 HP, 1725 RPM, Explosion Proof Motor, Class 1, Div.1, Group C & D
- **G** = 230/460V, 60 Hz, 3 Ph, 1/3 HP, 1725 RPM, Inverter Duty Motor, TENV
- **N** = No motor option / used with special motor requirements

**Notes:**
1. Walchem recommends the installation of a pressure relief valve and a pulsation dampener in the discharge line of the LK Series pumps. Contact your Walchem distributor for these and other control and accessory products from Walchem.

2. Maximum viscosity at rated output is 1000 cps for VS and S6, 500 cps for VH and 300 cps for VC and TC.

3. It is recommended that pumps be shielded from direct exposure to the elements.

**ABOUT US**
Walchem integrates its advanced sensing, instrumentation, fluid pumping and communications technologies to deliver reliable and innovative solutions to the global water treatment market. Our in-house engineering is driven by quality, technology and innovation. For more information on the entire Walchem product line, visit: www.walchem.com
