

A substitute gear oil for our LK-A/-B/-C pumps

T1170

Dear all customers,

Thank you for choosing our product.

Please be advised that we have seen the Mobilgear 600 XP 220 Gear Oil is not continuously available due to the unpredictable situation where the global oil industry falls upon today. In order to cope with this situation, we have started using a substitute gear oil, the Shell Omala S2 GX 220, for our LK-A/-B/-C pumps.

We assure our customers that the alternate oil performs totally the same as the previous one in any aspects of quality and property when used with these pump models.

This change only affects the instruction manual of the pumps. See below.

■ Page 33 (Instruction number: T1033)

Manufacture	Product name	Manufacture	Product name
Mobil	Mobilgear 600 XP 220	Shell	Omala S2 GX 220

*Before the new oil is used, use a flushing oil to remove the old oil from the reducing gear unit.

Thank you for your understanding and cooperation in this matter.

Please do not hesitate to contact us if you have any questions.

Best regards,

Iwaki Co.,Ltd.
