

Using the Configuration Menu in the W600:

Importing and exporting the User Config file (used to export and import programming from one controller to another, or to save):

From the Main Menu:

	Main Menu 17:2	21:16 2017-Jul-09	
	🖬 Inputs	X Config ←	
	I Outputs	© HOA	
	A Alarms	b∰ Graphs	
	-		
Press 🎽 Config			

- C C
- 2. Press the Down arrow until you see File Utilities, and then press File Utilities
- 3. Press the Down arrow until you see Export User Config File
- 4. Plug your USB stick in the port in the front of the controller (after unscrewing the port cover):

W600 Quick Programming Guide

Importing and exporting the User Config file (continued)

- 5. Press Export User Config File
- 6. Click the checkmark to confirm
- 7. File will export onto the USB stick.
- 8. Unplug the stick and either save it on your computer, or import it into another W600 controller.
- 9. To import, repeat the above steps, but at steps 3 and 5 press Import User Config File.
